Quality certificates

- * DIBT building approvals
- * MPA (German materials testing institute) monitoring agreement
- * DIN EN 1090 certification
- * Certified specialist as per paragraph 19 of the German Federal Water Act (WHG)
- * Safety management as per the SSC standard
- * Project related structural design, tested or testable
- * Material certificates according to DIN EN 10204 - 3.1 for steels
- * Tightness test records

Our product range

Waste water

- | | | |
|--------------------------|-------------------------------|----------------------|
| Digester | High performance reactors | SBR tanks |
| Hydrolysis tanks | Primary/Secondary clarifiers | Thickener tanks |
| Aeration tanks | Mixing and equalization tanks | Sludge tanks |
| Leachate storage tanks | Thickened sludge tanks | Drinking water tanks |
| Fire water storage tanks | Conical tanks | |

Gas storage

- Low pressure gas storage tanks
- Non-pressurized gas storage tanks
- Pressure protection
- Shaft equipment
- Emergency drains and gas domes

Silos

- Cereal storage
- CCM/Whole corn conservation
- Silage silos
- Bulk storage silos
- Meal silos

Slurry stores

- Enamelled slurry stores
- Stainless steel silos
- Covers
- Pump and mix technology

Biogas

- Digester with central agitator
- Digester with double membrane gasholder roof (dual purpose tanks)
- Beet storage
- Buffer tanks
- Digestate tanks

Our company

We have been designing and installing tanks and silos since 1959.

Henze-Harvestore GmbH is an international storage tank and silo constructor, with Europe as its core market. We work in the industrial, municipal, biogas and agricultural sectors.

We are international...

Over 90.000 tanks and silos in more than 110 countries says it all.

... and close to our customers

We offer our customers proven solutions that take into account special requirements. Our technical expertise enables us to customise our storage solutions to meet the specific needs of our customers.

The large number of tank diameters and heights allows to provide the correct tank for every plant.

Biogas plant in Canada

Our product

Steel is what we do

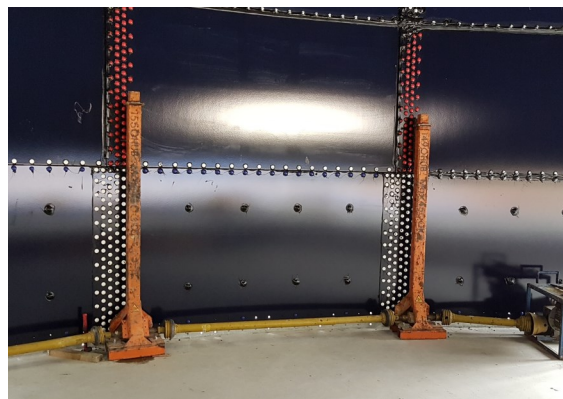

With depth knowledge and high commitment we work with bolted steel panel structures and equipment components. With our extensive scope of supply and services, we can provide you with a suitable tank or silo solution for almost every type of stored material.

We offer a whole range of enamel-coated, epoxy-coated and galvanized steels as well as various qualities of stainless steels.

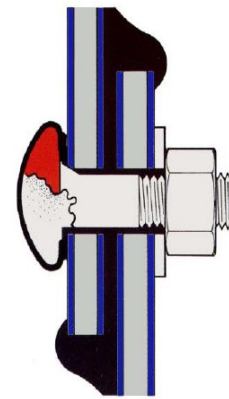

Our system

We offer you a hassle-free "one-stop" service. What does this mean? We provide you with comprehensive consultancy services as well as structural engineering and design, planning, and assembly services. All work stages are interconnected in a seamless workflow.

The storage tanks and silos made of prefabricated steel panels with standardised dimensions are bolted together and sealed at the installation site – no welding is required at assembly, construction times are short and installations can also be retrospectively extended upwards or downwards and even moved. This work is offered either as a complete assembly service provided by our team, or we also provide assembly supervision services.

Robust, plastic-covered bolted connections and a durable special elastic sealant guarantee you a versatile and watertight silo.

Examples of installations worldwide

Waste water project - Mexico

Biogas - Germany

Biogas - Russia

Slurry store - Hungary

Waste water project - Ghana

Biogas - Belarus

Drinking water - Ethiopia

Biogas - Argentina

Corn silo - Russia

Waste water project - Singapore

Waste water project - Saudi Arabia

Biogas - Japan

Gas storage tank - Switzerland

Drinking water - Indonesia

Biogas - UK

Corn silo - Hungary
