PRODESA

Your experts
in biomass pelleting

Turnkey solutions that meet all your needs, no matter the extreme temperature and humidity conditions, all over the world.

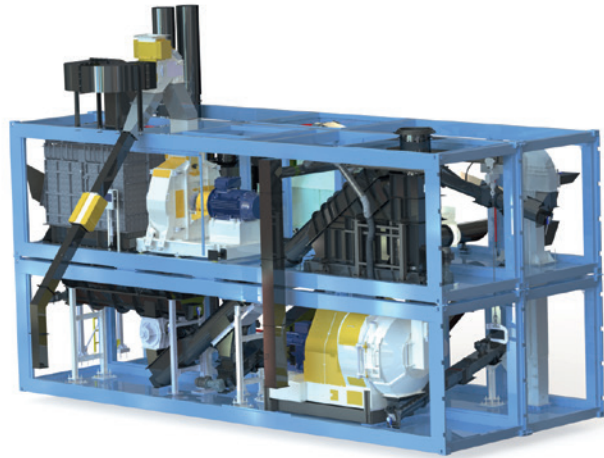

Design, manufacturing and supply of complete wood pellet plants or any of its processing lines such is biomass dryers or pelleting lines.

Turnkey solutions for biomass processing, thermal drying and **pellet production**

From round wood to pellets

PelletBOX by PRODESA

PRODUCTION PLANTS UP TO **30.000 ton/year**

Plug & play: our containerized pellet plant up to 5 ton/h. **PelletBox by Prodesa** combines the reliability and quality of **PRODESA** pellet plants with the versatility of a containerized plant.

PRODUCTION PLANTS UP TO **30.000 ton/year**

PRODUCTION PLANTS OF **100.000 ton/year**

PRODUCTION PLANTS OF **500.000 ton/year**

PRODUCTION PLANTS OF **200.000 ton/year**

BIOMASS COGENERATION

Power production associated to the use of thermal energy in low temperature drying systems. Integration on pellet production plants with a power production range from 600 kW to over 5.000 kW. Customized solutions according to every project demands.

REVAMPING

BOP SERVICES

- Civil works
- Mechanical and electrical construction
- Fire fighting systems
- Buildings
- Etc.

PROGRANUL

AdvancedPelleting by PRODESA

ProGranul Equipment is PRODESA manufacturing division for capital equipment. Decades of knowledge and experience in the pellet production field have result in the design of high performance units to meet the demands of the customers.

for pellet production

for raw material milling production
