

**Biogas
can do it!**

Whenever we need energy, biogas can deliver it:

Day and night, come wind or shine.

Decentral. Reliable. Climate friendly.

German Biogas Association

For almost 30 years, the German Biogas Association has been committed to the expansion of site-adapted, sustainable and decentralised biogas use at national and international level. Today, biogas plays a decisive role in the development of a sustainable energy supply.

Continuous political advocacy, public presence and an intensive exchange of experience and information have made us so strong.

That is our history. Many have contributed to it: full-time and honorary employees as well as about 5.000 members who ensure that we have become the largest biogas association in Europe.

GBA, your competent and reliable partner for:

- Tailor-made training courses on all biogas topics
- Support services for all biogas stakeholders
- Organization of international events and delegation trips to Germany / Europe
- Biogas consulting
- Publications on all relevant biogas topics
- Expert presentations at international events

Exclusive services for members:

- Access to GBA's network
- Reduced fees at the GBA BIOGAS Convention & Trade Fair
- Special conditions for advertising in our Biogas Journal and other publications
- Our in-house pool of competent experts for exclusive and fast access to important information and assistance in case of problems and questions.

What others say about us ...

“Our partnership project with GBA is very fruitful for us in terms of know-how transfer and exchange of information. IBA highly benefits from GBA's long-time experience in association work, representation of interests and technical issues”.

Gaurav Kedia, Managing Director Indian Biogas Association (IBA)

“We are very happy to have engaged GBA for our biogas training program for stakeholders from public authorities and other capacity-building measures in Serbia. GBA offers in-depth knowledge and high-quality training materials”.

Milica Vukadinovic, Project Coordinator GIZ Serbia
Project “Development of a Sustainable Bioenergy Market in Serbia”

„We held successful biogas trainings with GBA in the Dominican Republic and received very good feedback from our partners. GBA has great technical expertise and plenty of experience in political framework related to biogas. This combination makes GBA a valuable partner for GIZ“.

Clemens Findeisen, Director,
Energy Transition Project, GIZ Dominican Republic
